PROFILE SUMMARY

Full-Stack Software Engineer specializing in frontend development, building practical SaaS applications using React, Next.js, Node.js, and TypeScript. Experienced in integrating both frontend and backend systems, with a solid understanding of Microservices architecture, System Design, SOLID principles, and CI/CD pipelines. Focused on writing clean, maintainable code that delivers straightforward and effective business solutions.

EDUCATION

Zagazig University

BSc Computer and Information Systems (GPA: 3.4/4.0).

Zagazig, Egypt

2023 – Expected 2027

Information Technology Institute (ITI)

Web Development Using React JS (Summer Program)

Completed Aug. 2025

PROJECTS

Note: Showcasing major full-stack and SaaS systems. Additional learning and minor projects are available on [GitHub](#).

HRMS & Recruitment SaaS Suite | [Next.js](#), [Node.js](#), [Prisma](#)

Dec. 2025 – June 2026

- **System Overview:** Co-developed a SaaS ecosystem integrating an internal HRMS for managing employee lifecycles, payroll calculations, department hierarchies, and asset workflows.
- **Full-Stack Architecture:** Developed backend services and APIs for **Assets, Departments, Jobs, Insurance, and Reporting** modules ([Live](#) | [GitHub](#)). Used Node.js, Express, and Prisma ORM, applying Clean Architecture and TypeScript interfaces to manage data flow behind a reverse proxy.
- **Recruitment Portal:** Built the frontend of the public recruitment web portal ([Live](#)), creating interfaces for candidates to browse and filter job openings.
- **Performance:** Implemented route-based code splitting, dynamic loading, and React Query caching, reducing initial payload size by 45% and achieving solid Lighthouse scores (**93% Performance, 95% SEO**).

Zag-Eng-Family – Academic Platform | [Live](#) | [GitHub](#) | [React](#), [RTK Query](#)

Feb. 2025 – May 2026

- **System Overview:** Collaborated on an academic platform serving 5,000+ engineering students, allowing them to browse and register for events and workshops.
- **Dashboard:** Contributed to the administrative dashboard to manage users, event lifecycles, educational tracks, and team assignments.
- **Frontend Development:** Implemented bilingual (AR/EN) forms using React Hook Form and Zod to handle complex data with type-safe validation.
- **Optimization:** Applied optimizations that reduced the initial JavaScript bundle size by 40% and minimized redundant API requests using RTK Query caching.

Rochetta – E-Commerce Pharmacy | [Live](#) | [GitHub](#) | [MERN Stack](#), [Paymob](#), [AI Integration](#)

Jul. 2025 – Aug. 2025

- Spearheaded full-stack development of a responsive SaaS pharmacy platform utilizing the MERN stack.
- Engineered role-based dashboards for Administrators (providing full dynamic control over user-facing content) and Delivery Personnel to streamline order fulfillment workflows.
- Architected backend database models for Orders and Reviews, and integrated the **Paymob** payment gateway to securely process seamless online transactions.
- Incorporated AI features and a real-time notification system to enhance user engagement and provide instant order updates.
- Optimized build and asset performance, achieving an fast **7-second build time** and compressing the main production bundle to just **72 KB**.

Business Incubator Platform | [Live](#) | [GitHub](#) | [Electron.js](#), [React](#)

Jan. 2026 – Feb. 2026

- Collaborated within a team to build a business incubator platform consisting of a web portal and a dedicated desktop dashboard.
- Contributed to developing the cross-platform desktop dashboard using Electron.js and React to track startup progress and manage resources.
- Worked with the team to integrate the desktop environment with the main backend ecosystem.

Ketabak – E-Commerce Bookstore | [Live](#) | [GitHub](#) | [Vanilla JS \(ES6+\)](#), [HTML5](#), [CSS3](#)

Dec. 2025

- Built a responsive e-commerce storefront using pure Vanilla JavaScript to strengthen fundamentals in DOM manipulation and client-side state handling.
- Implemented search, filtering, and pagination features while maintaining lightweight performance without framework dependencies.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Framer Motion, HTML5, CSS3
Backend & Database: Node.js, Express.js, Prisma ORM, PostgreSQL, MongoDB, Microservices
Architecture & Concepts: System Design, SOLID Principles, Clean Architecture, CI/CD Pipelines
State Management & Fetching: Redux Toolkit, RTK Query, React Query, Zustand, Context API
Forms & Validation: React Hook Form, Zod
Tools & Practices: Git, GitHub, Jira, Agile/Scrum, Electron.js, Docker, AI Integration
