EXPERIENCE

Freelance Projects

Independent Contractor.

Remote

MAY 2025 – Present

- Developed and delivered custom, responsive web solutions for various clients on freelance platforms, translating business requirements into functional user interfaces.
- **Client Project: Centralized Academic Resource and Event Management System(JUN 2026 – Present)**
- Developing a centralized educational ecosystem for 5,000+ engineering students to streamline academic resource sharing and workshop management.
- Implemented complex bilingual forms (AR/EN) using React Hook Form and Zod, handling deeply nested data structures with strict type-safe validation.
- Optimized data fetching by integrating RTK Query's caching and automated revalidation, reducing redundant API calls.
- Built reusable and highly customizable UI components using Tailwind CSS, ensuring a consistent user experience.

PROJECTS

HR Management System | [Next.js](#), [React](#), [TypeScript](#), [React Query](#), [Zustand](#).

Dec. 2025 – Present

- **Candidate Portal (Completed):** [Live](#) | [GitHub](#) – Developed a candidate-facing React application using Zustand and React Query, enabling users to browse and apply for jobs. Implemented pagination and job filtering features based on keywords, country, experience level, and work mode.
- **Admin Dashboard (Ongoing):** Building an admin dashboard using Next.js and TypeScript to oversee job postings, applicant tracking, and asset custody.
- Implemented role-based access control (RBAC) to securely manage granular permissions for HR administrators and managers.
- Leveraged Next.js Server Components and React Query to optimize data fetching and server-side filtering.

Business Incubator Platform | [Live](#) | [GitHub](#) | [Electron.js](#), [React](#), [Tailwind](#).

Jan. 2026 – Feb. 2026

- Built a cross-platform desktop application using Electron.js to provide a dedicated workspace for incubator administrators.
- Designed a unified interface to track startup progress, allocate resources, and manage communication workflows efficiently.

Ketabak – E-Commerce Bookstore | [Live](#) | [GitHub](#) | [Vanilla JS \(ES6+\)](#), [HTML5](#), [CSS3](#). Dec. 2025 – Dec. 2025

- Built a responsive frontend for a bookstore without relying on modern frameworks.
- Engineered client-side search, multi-criteria filtering, and pagination functionalities.
- Designed interactive UI components, including simulated authentication flows.

CV Creator Web Application | [Live](#) | [GitHub](#) | [React.js](#).

Oct. 2025 – Oct. 2025

- Developed an interactive web tool that generates professional, ATS-friendly resumes.

- Implemented a dynamic data-binding system that auto-populates user inputs into distinct templates, enabling seamless PDF exports with embedded hyperlinks.

Rochetta – Online Pharmacy | [Live](#) | [GitHub](#) | *React.js, RTK Query, Tailwind CSS*. Jul. 2025 – Aug. 2025

- Built a responsive e-commerce application featuring a dynamic product catalog and an optimized shopping cart system.
- Integrated RTK Query for efficient data fetching, automated caching, and state synchronization.
- Improved application rendering and load times by implementing Code Splitting and Lazy Loading.
